

Year Five and Six Maths 'STEM' Workshop

On Monday 5th December, children from Year Five and Six had an action packed morning developing their Maths skills. During the workshops, the children played 'Magic Maths' a board game where the children had to use their knowledge of the four operations to calculate answers, The children also used IPADS to play Maths games and solve questions by scanning QR codes which were dotted around the hall. Great fun was had by all!

'I loved playing all the different games. It was hard but made Maths fun.'

Kevin, 6CJ

'I liked playing the Maths Magic board game because it made me think about my method and calculations. Also, to think about what method would give me the highest answer.'

Reo, 5CS

'First of all we played a game where you could plus, take-away, times and divide to get a score. The person with the biggest score wins (the game is called Magic Maths). I enjoyed it all and loved using the IPADS in particular.'

Mason, 6JW
